Day 1 Task — Threat-Model Your Phone

Time needed	Deadline	Where to submit
30 minutes	Before the Day 2 session	Portal → Day 1 → Upload

Your phone is the most valuable device you own. Today you will look at it the way a security professional does: what is worth protecting, what could go wrong, and what stops it.

Step 1 — Fill in the table (5 rows)

Row 1 is an example. Replace it with your own and add four more.

#	Asset (something valuable on your phone)	Threat (how it could be harmed)	Protection (what stops it)
1	Banking app	Phone stolen while unlocked	PIN + auto-lock after 30 seconds
2			
3			
4			
5			

Ideas for assets: photos, contacts, email, WhatsApp, UPI/payment apps, saved passwords, location. Ideas for threats: theft, phishing link, public Wi-Fi, old apps, someone who knows your PIN.

Step 2 — Answer one question (2–3 lines)

Which threat from your table worries you most, and what will you change on your phone today?

Step 3 — Two quick checks

1. Go to **haveibeenpwned.com** and enter your email. Write the number of breaches found (just the number, not the details).
2. Go to **phishingquiz.withgoogle.com** and take the quiz. Write your score out of 8.

Check	Your result
Have I Been Pwned — number of breaches	
Google Phishing Quiz — score out of 8	

Step 4 — Complete this sentence

“Before today I thought cyber security was _____, now I think it is _____.”

How to submit

- One file: Google Doc, PDF, or a clear photo of handwritten work
- Must contain: the Step 1 table, your Step 2 answer, both Step 3 results, and the Step 4 sentence
- Upload under Day 1 on the portal before the Day 2 session

Marks (out of 10)

Part	Marks
Step 1 — table complete and realistic	5
Step 2 — answer shows reasoning	3
Step 3 — both checks done	1
Step 4 — sentence	1

This task counts toward your lab journal (30% of the program grade). The best tables will be discussed in the Day 2 session, with your permission.
