Day 3 Task — Account Lockdown

Time needed	Deadline	Where to submit
45 minutes	Before the Day 4 session	Portal → Day 3 → Upload

Today's task is real, not a simulation: you will lock down your own accounts, starting with the one that can reset all the others — your main email. Never share actual passwords, codes or screenshots of them in your submission.

Step 1 — Lockdown checklist

Do each item and tick it. Write a one-line note (e.g. which app you used). Never write a password here.

#	Action	Done	Note
1	Install a password manager (Bitwarden, 1Password, or Apple/Google built-in) and create a master passphrase of 4–5 random words		
2	Enable MFA on your main email using an authenticator app (not SMS, if possible)		
3	Save your email's MFA backup codes somewhere safe (in the manager or offline)		
4	Check your email on haveibeenpwned.com — write the number of breaches		
5	Change the password on every breached or reused account to a unique passphrase from the manager (count how many)		
6	Enable MFA on one more account: banking, Instagram, GitHub or the Tekloomy portal		
7	Check your email's recovery phone and recovery email are correct and also MFA-protected		
8	If you have security questions anywhere, replace the answers with random words stored in the manager		

Step 2 — Password strength test (no real passwords!)

Write three made-up passwords in the styles below and estimate, from today's lecture, how long each would take to crack. Then explain in one line why.

Style	Your made-up example	Estimated crack time	Why
Short + symbols (8 chars)			

Style	Your made-up example	Estimated crack time	Why
Common word + year			
4-word passphrase			

Step 3 — Two questions (2–3 lines each)

1. Which account of yours would hurt most if taken over, and what did you change today to protect it?

2. Your phone shows 15 MFA approval prompts you didn't request, then a WhatsApp from “IT support” saying “just approve it and they'll stop”. What do you do?

How to submit

- One file: Google Doc, PDF, or a clear photo of this sheet filled in
- Must contain: the ticked checklist with notes, the strength table, and both answers
- Do NOT include real passwords, backup codes or screenshots of codes — only tick marks, counts and notes
- Upload under Day 3 on the portal before the Day 4 session

Marks (out of 10)

Part	Marks
Step 1 — checklist completed with notes	5
Step 2 — strength table with reasoning	2
Step 3 — both answers show understanding	3

Counts toward your lab journal (30% of the program grade). If a step is impossible for you (e.g. no smartphone for an authenticator app), write why in the note — honesty scores full marks.
