Step-2

I am mostly worried about phishing links and account hacking. Everything related to me on that like my photos, saved password / credentials. If my private photos and password leak it will cause huge harm on my identity.

I will enable 2FA and app lock on all important app, avoid sharing personal information and clicking suspecious link.

Step-3:

| Check | Result |
|---|---|
| Have I been pwned | 0 |
| Phishing quiz | 7 |

Step-4

"Before today I thought cyber security was easy to learn, now I think it is constantly developing every day"

# Day 1 - TASK - Threat model your phone

Page
Date

## # Step 1

| # Assest | Threat | Protection |
|---|---|---|
| 1) Watsapp msg/chats | Someone borrowed my phone and read private chats | App or fingerprint lock & more Security in Sensitive data |
| 2) Google account and photos | all Stuff related to google account hacked and leaking photos | Enable 2FA on Google account |
| 3) Saved password (chrome) | Clicking phishing link & hacker getting password | Avoiding phishing links & enable biometric for autofill |
| 4) Live location data | Third-party apps track location in background | Allow app permision for location only while using app |
| 5) UPI Apps (Google pay, Navi etc) | Phone getting stolen while unlocked | Separate PIN/ password for UPI app |
